# Minimum Requirements for Sign Permit Applications

We would be pleased to accept your application once the following minimum requirements have been met. **Please check boxes to indicate application is complete. Incomplete applications will not be accepted.**

1. A completed application form and non-refundable application fee of \$50.00 for each proposed sign (double for each sign erected prior to permit issuance). Refer to Section 3.5 of the Delta Sign Bylaw for comprehensive sign plan fees and additional fees.

2. Two sets of scaled and metric dimensioned drawings including:

- A site plan showing property and premises dimensions and location(s) of signs.
- Building elevations of all businesses on the site, showing the existing and proposed signs.

A large scale detail of the proposed sign(s) including:

- Sign dimensions;
- Sign area;
- Copy area;
- Percentage copy area;
- Changeable copy area;
- Height of sign;
- Clearance beneath sign;
- Illumination: Direct \_\_\_ Indirect \_\_\_.

At least one colour copy of the sign is preferred. If this is not feasible, indicate the colours and type of materials used in the corresponding areas.

A cross section of the proposed sign including anchorage and or attachments details. This will include a cross section of the sign showing the:

- thickness of the sign;
- wall construction at the sign i.e., concrete, wood or steel stud & spacing;
- type of bolts or screws including the length, diameter and spacing;
- foundation size and depth for freestanding signs.

Drawings that are signed and sealed by a Professional Engineer for freestanding and projecting signs and for canopies (including awnings) require Schedules B1 and B2 for structural.
